

July 14, 2026

Dear Editors,

Herewith, we submit the attached manuscript „Accelerating Metagenomic Identification of DNA Sequences Using Artificial Neural Networks” to be considered for publication in MDPI BioMedInformatics. Using embeddings has revealed their high potential in efficient taxonomic identification. We propose a new algorithm and new software based on deep neural networks that accelerate this process.

This system is available on the project webpage <https://github.com/pfgryz/exquisitor>.

I confirm that this manuscript has not been published elsewhere and is not under consideration by another journal. All authors have approved the manuscript and agree with its submission to MDPI BioMedInformatics.

I hope the manuscript will receive your kind consideration.

Sincerely,
Robert Nowak
